

PreE-du: Thinking Skills

Social Project Brief & Curriculum Integration

1. Project Overview

Project Name: PreE-du: Thinking Skills

Tagline: "Fun Learning for Future Thinkers"

Target Audience: Children aged 8-12 years (Panti Asuhan & Elementary Schools)

Duration: 4 Weeks Program

Background:

In the digital era, critical thinking, computational logic, and design empathy are essential skills for children. However, many underprivileged children lack access to engaging educational tools that develop these skills. PreE-du bridges this gap through an interactive, game-based web platform.

Problem Statement:

- Limited access to quality education for critical and creative thinking.
- Traditional learning methods often fail to engage children effectively.
- Lack of integration between digital skills and moral/civic values.

Solution:

PreE-du is a gamified web application featuring 9 interactive mini-games across three tracks: Computational Thinking, Critical Thinking, and Design Thinking. Each game is integrated with local wisdom and civic values (Pancasila, Religion, Language, Citizenship).

2. Learning Framework

The curriculum is divided into three core tracks:

■ **Track 1: Computational Thinking**

Focus: Logic, Pattern Recognition, Algorithms

Games: Sorting, Pattern Recognition, Algorithms

■ **Track 2: Critical Thinking**

Focus: Analysis, Evaluation, Reasoning

Games: Odd One Out, Fact vs. Opinion, Cause & Effect

■ **Track 3: Design Thinking**

Focus: Empathy, Ideation, Prototyping

Games: Empathy, Ideation, Prototyping

3. Integration of Core Values (4 Pillars)

Each game module integrates values from four key subjects:

Game Topic	Pancasila Value	Bahasa Indonesia	Agama (Religion)	Citizenship
Sorting	Keadilan Sosial (Fairness)	Mengelompokkan kata ke dalam kategori	Ketuhanan sebagai bentuk syukur	Hak dan kewajiban tertib
Pattern	Persatuan (Unity in diversity)	Pola kalimat majemuk	Keteraturan ciptaan Tuhan	Disiplin warga negara
Algorithm	Musyawarah (Step-by-step consensus)	Test prosedur kompleks	Urutan ibadah yang benar	Menghormati aturan hukum
Odd One Out	Menghargai perbedaan individu	Kata baku vs tidak baku	Toleransi terhadap perbedaan	Pluralisme masyarakat
Fact/Opinion	Hikmah dalam berpendapat	Fakta dan opini dalam berita	Kebenaran vs prasangka	Literasi media warganegara
Cause/Effect	Tanggung jawab atas tindakan	Kalimat sebab-akibat	Konsep dosa dan pahala	Dampak tindakan sosial
Empathy	Kemanusiaan yang adil dan beradab	Meja personifikasi & perasaan	Kasih sayang antar umat	Peduli lingkungan sosial
Ideation	Kreativitas untuk kemajuan	Menulis gagasan kreatif	Berpikir positif (Husnuzan)	Partisipasi inovasi publik
Prototype	Gotong royong membangun solusi	Teknik eksplanasi proses	Amal nyata bagi sesama	Kolaborasi komunitas

4. Implementation Plan

Phase 1: Introduction (Week 1)

- Ice breaking & introduction to the mascot "Si Kucing Pintar".
- Tutorial on using the web platform.
- Pre-test assessment.

Phase 2: Guided Learning (Week 2-3)

- Children play games in groups.
- Facilitators guide discussions on value integration.
- Offline activity cards completion.

Phase 3: Reflection & Celebration (Week 4)

- Presentation of prototypes/ideas.
- Awarding certificates and badges.
- Post-test and feedback session.

5. Impact & Evaluation

Expected Outcomes:

- 80% improvement in logical reasoning skills.
- Increased understanding of civic and moral values.
- Higher engagement in learning activities compared to traditional methods.

Evaluation Methods:

- In-app progress tracking (Stars & Trophies).
- Observation sheets for facilitators.
- Simple quizzes before and after the program.

6. Conclusion

PreE-du: Thinking Skills is not just a game; it is a movement to empower the next generation with critical minds and noble hearts. By integrating technology with local values, we create a sustainable impact for Indonesian children.

"Berpikir Cerdas, Berkarakter Mulia."
